PIVOT CHART

A pivot chart is a graphical representation of data summarized using a Pivot table. It helps us analyze, compare and understand large amounts of data through charts

Example: Using cookies sales data, we can create a pivot chart to compare the profit of different cookies accross different cities

How to create a pivot chart in Excel

- Prepare the datasets
- Selects any cell within the dataset
- Insert pivot chart ⇒ go to insert tab and choose pivot chart
- Choose the data range
- Select the chart location as New worksheet
- Arrange the fields by drag and drop
- Choose chart type such as clustered column, Bar, line chart
- Customize the chart ⇒ Add a chart title, labels and other formatting as needed
